

AI-powered Nutrition Analyzer for Fitness Enthusiasts

Configure Image Data Generator Class

Date	19.11.2022
Team ID	PNT2022TMID47872
Project name	AI-Powered Nutrition Analyzer for Fitness Enthusiasts

Image Data Generator class is instantiated and the configuration for the types of data augmentation

There are five main types of data augmentation techniques for image data; specifically:

Image shifts via the with shift range and height shift range arguments.
The image flips via the horizontal flip and vertical flip arguments.
Image rotations via the rotation range argument
Image brightness via the brightness range argument.
Image zoom via the zoom range argument.

An instance of the Image Data Generator class can be constructed for train and test.

Image Data Agumentation

```
#s #setting parameter for Image Data agumentation to the traing data
tr train_datagen = ImageDataGenerator(rescale=1./255,shear_range=0.2,zoom_range=0.2,horizontal_flip=True)
#I #Image Data agumentation to the testing data
te test_datagen=ImageDataGenerator(rescale=1./255)
```
