

AI-powered Nutrition Analyzer for Fitness Enthusiasts

Date :	19/11/2022
Team Id :	PNT2022TMID47872
Domain Name :	AI-powered Nutrition Analyzer for Fitness Enthusiasts

Build Python Code

Importing Libraries

- The first step is usually importing the libraries that will be needed in the program.

```
from flask import Flask,render_template,request
# Flask-It is our framework which we are going to use to run/serve our application.
#request-for accessing file which was uploaded by the user on our application.
import os
import numpy as np #used for numerical analysis
from tensorflow.keras.models import load_model#to load our trained model
from tensorflow.keras.preprocessing import image
import requests
```

- Importing the flask module into the project is mandatory.
- An object of the Flask class is our WSGI application.
- Flask constructor takes the name of the current module (`__name__`) as an argument Pickle library to load the model file.
